

INTELLIGENT BUILDING SOLUTION

Lighting & Dimming

Set elegant lighting scenes to match your lifestyle. Lighting control can enhance the enjoyment and value of your home and contribute to savings on your energy bill. Miles Magic Lighting Control can even be retrofitted into existing homes without adding new wiring.

Energy Management

Want to keep your home comfortable while saving money on your energy bill? Schedule, monitor and manage all systems and devices from Miles Magic touch panels, or remotely from PCs, for the ultimate comfort and convenience, while reducing costs and maximizing energy efficiency.

Curtain Control

Make life easier! You don't have to get up from your seat to operate one or several curtains all at once. Operate them effortlessly by a simple press on your remote control handset. Programme curtains in such a manner that they understand your moods and feelings. In the morning they move apart to allow the sunlight in, at noon they are closed for your siesta.

HVAC Control

Heating, Ventilation and Air Conditioning (HVAC) solutions include temperature and humidity control. One of the most important aspects to a homeowner because it can both save money and help the environment.

Security & Surveillance

Protect your loved ones, home, and property around the clock. Keep a watchful eye around your home, even when you're away. Limit admission to designated areas using Miles Magic Access Control products. When you swipe a card you can accomplish multiple functions such as arming or disarming security and activating a door strike to open a door.

Entertainment

Miles Magic makes watching movies and listening to music easy again. Our home entertainment system is simple to use, easy to install and affordable. Imagine the entire family's media - CDs, MP3s, satellite radio, DVDs - all brought together in a single system.

Global Presence

United States of America :

Miles Magic Products

The most consistently ranked #1 remote / tablet custom solution brand from USA

For 25 years, URC has set the higher standard for control and home automation technology to make it easier for everyone to use. Through our comprehensive solutions, we can help you provide the best experiences for control of music, video, lighting, climate, security and much more.

- Family of most advance and elegant controllers
- Has a wide array of stylish and user friendly control interfaces like Remotes, Keypads, Touch Screens and Mobile Apps.
- Award Winning DMS-AV Products Includes Single and Multi zone Amplifies, Streamer etc for high quality music around the house from any source.

Connect almost any electrical device to a network.

The Global Caché is a family of products designed to connect almost any electrical device to a network in a matter of minutes.

Based on open systems and industry standards, the ultra-compact device fits in the palm of your hand and includes a choice of wireless WiFi or wired TCP/IP connectivity to infrared (IR), serial (RS232), and contact closure (relay) equipment. The innovative design of the Global Caché allows for easy and flexible integration with the control software of your choice.

The Global Caché is a simple wired or wireless conduit between you and your device over a network or the Internet. This is instant network-enabling at its best, delivering the power of choice at a cost-effective price.

IP based, decentralized wired control system

Luxom is an IP based wired, decentralized control system for Home & Building Automation with an open protocol. That Integrates different technologies in a building like lighting, heating, ventilation, motorized Curtains and blinds, intrusion and security, audio & video installation and Internet.

- Designed & Manufactured in Belgium
- High load capacity (2000 watt per channel)
- 2-way communication (i.e. send status of load)
- Allows interfacing with multi-media systems (URC, Global Cache, Creston, Control4, AMX) over RS232, RS485, Ethernet
- Freedom of using standard wall switches

Zigbee based decentralized Wireless Control System

CityGrow® is Zigbee based decentralized Wireless Control System for Home and Building Automation. It works on the Zigbee Wireless Communication Standard IEEE 802.15.4.

- Easy to install & easy to use , state of art product & technology from Hong Kong
- Retrofit design for direct replacement of old fashioned switch
- Plug n Play installation, No drilling , no heavy work
- Negligible power consumption, Very low operating voltage(i.e. 6 volt DC)
- High load handling capacity (i.e. nearly 2000 watt per module)
- 2 way communication (i.e. send status of load)
- Sleeping mode (i.e. no constant radio emission)

wireless RF Based decentralized control system

Teleco is RF based, wireless decentralized control system for Home & Building Automation. Easy to install & easy to use , state of art product & technology Design & Manufactured in Italy

- Plug n Play installation, No drilling, no heavy work
- Wide range of dimmers for every type of Light
- Negligible power consumption, Low operating voltage (i.e. 24 volt DC)
- High load handling capacity (i.e. nearly 3000 watt per channel)
- Widest Wireless Range of 100 meters in Open Area
- Truly compact for installation anywhere even in restricted spaces: mounted on a wall, DIN rail, suspended ceiling, recessed or even concealed inside wall plates

Bring your vivid imagination to light

Lithoss, the international renowned design company of Belgium that famous for its traditional high end design switches designed and manufactured in Belgium only.

Lithoss Classic is a series of traditional handmade design switches. The unique Lithoss design in combination with exclusive handmade finishes (like brushed stainless steel, polished chrome, authentic bronze and gunpowder black, ...) are in perfect harmony with your home interior.

Lithoss Piano Series is being deigned & developed after 2 years hard work based on a high end composite material added with exclusive mineral to create the cold 'corian like' feeling.
